Sirs,

As a researcher, I have the honor to seize this opportunity in order to submit to You one of my projects entitled **« The Humo application : An invaluable initiative that can be operated by a social network or by an express courier company »**.

After reading this project (written in French), you will realize that **META** can adopt it to create a new social network or, if possible, to increase the services of **WhatsApp** or **Instagram**.

Best regards,

Philibert Mboum
